SUMMARY

Software Engineer with 5+ years building production web and mobile products in Scrum teams. Strongest on Vue.js, Quasar, and React for the web, Quasar and React Native for mobile, and Laravel REST APIs on the backend. Works daily in Cursor with AI-assisted coding for faster delivery, debugging, and reviews, and uses Cypress for end-to-end coverage on critical flows. Focused on clear interfaces, reliable releases, and code that is easy for the next engineer to maintain.

EXPERIENCE

Software Engineer — Proficient Information Systems

Feb 2022 – Present

Gulshan, Dhaka · Web & Mobile

- Own production UI delivery in Vue.js, Quasar, and React, from screen design through Laravel REST API integration.
- Ship mobile apps with Quasar and React Native, keeping navigation and shared UI patterns aligned with the web product.
- Use Cursor and AI-assisted workflows to speed up feature work, refactors, debugging, and pull-request reviews.
- Write Cypress end-to-end tests for critical user flows so regressions are caught before release.
- Deliver in Scrum: refinement, estimation, implementation, review, and release with the team.
- Partner with backend and QA on Laravel API contracts, defect fixes, and release readiness.

Software Developer — Pretty Group Ltd.

Jul 2021 – Jan 2022

Gulshan, Dhaka

- Scoped features with the team and shipped them as production web applications.
- Built product features with React, Next.js, Redux, Vue.js, Laravel, and MySQL, including a multi-vendor marketplace and an internal hiring site.
- Stabilized live applications by tracing defects, supporting integrations, and maintaining existing flows.
- Worked in Scrum and presented progress in team and management reviews.
